

DAZZLE

Dazzle is proof positive that Man and Mother Nature really can coexist. There's simply no healthier, more natural way to care for your pool or hot tub. Dazzle offers effective solutions that work with Mother Nature, not against her — so you can keep the sparkle in your pool or hot tub and feel good about the difference you're making!

Our inspiration comes from nature. Wherever possible, we design our formulas with natural components and we learn from nature's processes (biomimicry). When it comes to product development, our philosophy is simple: Nature is our Model, our Measure, our Mentor.

We are proud of our passion to bring healthier, more natural chemistry to pool and hot tub water care...but that's just one dimension of who we are, what we believe, and what we offer you. For us, it's about finding **simply better** solutions to gently care for your swimming pool and hot tub water without creating unnecessary havoc to the environment. And, we strongly believe that greener chemistry should never come at the expense of exceptional product performance.

Dazzle donates a percentage of sales from every pool and hot tub product toward helping to raise funds needed to provide African communities with a clean, renewable source of fresh drinking water by building and drilling wells in small villages that are in need.
