Get Ready to Put Your Pool to Bed

Sadly, it's time to start thinking about closing your pool. Book your pool Closing/Opening Package early to secure your preferred date. Please carefully review the enclosed Closing/Opening Packages Form and fill out your order which can then be faxed, emailed or dropped off at our store.

Water Testing

Come in for a complete water test 2-3 weeks before closing down your pool. Closing a pool that is clean, clear and properly balanced helps ensure better conditioned water in the spring.

Chilly Outside? Who Cares!

Napoleon Patio Heaters are a great way to extend your season and are the perfect solution for chilly nights like we experienced this past summer. Stay warm and toasty while you enjoy an early morning coffee pool side, a relaxing bar-b-q with friends or a quiet moment on your deck long after the sun has gone down.

Here are just a few of the unique features of our Napoleon Patio Heaters:

- Generate infrared radiant heat rays (heats objects rather than surrounding air keeping you cozy and warm)!
- Portable; just move the heater to wherever you want the warmth!
- Efficient clean burning performance and uses less fuel while providing ultimate comfort
- 20 foot diameter of radiant warmth.
- Equipped with electronic pilot ignitions and adjustable heat controls.
- Durable cast aluminum body with a rich pewter look.

Deep Cleanse Your Filter this Fall

Dazzle™ Filter Cleanse is a powerful, next generation deep cleanse for your pool filter. It removes oils, dirt, debris, and organic build-up to ensure maximum filter performance in the spring.

Tip: Fall closing is the ideal time to clean your filter. Don't wait until spring—it's like letting a lasagna dish sit over the entire winter and then trying to clean it in spring!
