BACKYARD LIVING

THE ULTIMATE IN CLEAN WATER

ACTIVATOR uses a unique mineral base to take your pool water to the next level of CLEAN. Check out the benefits:

- Enhances water quality, lessens sanitizer consumption and makes water feel silky smooth
- Stops the key life process for algae using unique phosphate removal technology
- Adds powerful, cleansing enzymes to the water which break down unsightly oils and organics

SAVE 50%

Purchase one 4kg box of Activator and receive a second 4kg box at half price. (80,000L pool requires 8kg Activator in total)

Coupon expires June 13, 2010.

5 HOT TIPS FOR DAZZLING BLUE POOLS

Spring is early this year! Winter has been short and kind, making it even easier to start thinking about pool season 2010. At Mayfair, we've been busy these last few weeks preparing for a head start to what promises to be a sensational summer.

1: WATCH YOUR WATER TEMPERATURE Warmer water and rainstorms add to the chlorine demand of a swimming pool. Every 6 degree F rise in water temperature translates to a pool requiring 50% more chlorine to do the same job as before.

2: TEST YOUR SANITIZER LEVEL Test it at least once a week. Make sure you have adequate sanitizer levels especially when you are heading into the weekend when people are most likely to be swimming. Timing is everything.

3: FEWER STICKS, MORE OFTEN You'll get more consistent chlorine or bromine readings by applying FEWER sticks through the skimmer. Just do it more often. This gives a more consistent release of chlorine into the pool and saves you money.

4: LET THE WATER BREATHE Remember to take your solar blanket off the pool periodically to let the water breathe. Ideally removing the cover for at least 4-8hours a day is preferable.

5: CLEAN YOUR POOL FILTER ONCE A YEAR Clean also after an algae problem. For best results use Dazzle Filter Cleanse, an environmentally-friendly cleaning product which features a non-toxic, readily biodegradable formula that cleans filter cartridges and sand of common grease, oil, scale and mineral deposits.

POOL SCHOOL SEMINAR

WHEN

Tuesday, April 20, 2010, 7:00 pm.

WHERE

Unionville Curling Club
257 Carlton Road, Unionville.

WHO SHOULD ATTEND?

Our school is for new pool owners and those just interested in a refresher course.

WHAT WILL I LEARN?

Learn helpful tips and practical lessons on how easy it can be to achieve and maintain sparkling, blue water.

GUEST SPEAKER

Rob Pagliaro has 20 years experience in the pool industry with a specialty focus on water chemistry and pool chemicals.

We invite all the seminar attendees back to our store location (4261 Hwy #7) to receive 15% off their chemical purchases that evening.

WATER TESTING

BALANCED WATER IS KEY

Phosphates are a naturally occurring food source for algae, which can create a significant demand for your chlorine or bromine. High levels of phosphates can make successful water management problematic and costly. Testing for phosphates in your pool water is just one of the levels we check to make sure your pool is properly balanced.

FREE water testing, along with a computerized diagnosis, is a service we offer to all our customers. Monthly testing will ensure balanced water. This means safe water for your equipment, vinyl liner or concrete finish and most importantly safe, healthy water for you and your family.

Approximately 1 week to 10 days after opening, bring your water sample to our store so we can help you get your pool water balanced which will start your season off on the right foot.

*For every perfect water sample tested by us, Mayfair Pools will donate \$2 to **Share the Gift of Water**, a program that provides African communities with clean, renewable sources of fresh drinking water. See their Web site for details: sharethegiftofwater.com*
